The Norika® Multilayer PEX pipes, is a three layer pipe in which it consist of materials PEX-B for its outside and inside layer while the middle layer is made of aluminum. The Norika® Multilayer PEX pipes have an operating pressure of 10bar and working temperature of 0°C to 70°C. External and internal layer is made of silane cross-linked polyethylene that is extensively used in distribution of potable water. The silane cross-linking provides superior chemical and mechanical properties. While the intermediate layer is an aluminum alloy with overlapped welding that guarantees a total barrier to the passage of oxygen and light and provides excellent mechanical and chemical properties. It is applicable for hot and cold potable water applications also used for under floor heating system. The Norika® Multilayer PEX pipes complies with BS EN ISO 21003, ensuring quality, safety, and performance in multilayer piping systems.

Main advantages of multilayer pipes:

- Increase in internal pressure resistance.
- Ductility. Thanks to its aluminum layer, once pipes have been curved it will keep that form.
- Tightness to oxygen diffusion.
- Dimensional stability.
- Long service life.
- Higher flow.

PAP: Polyethylene-Aluminum composite pipeline

A pipe composed of a welded aluminum tube as the middle layer, with both the inner and outer layers made of polyethylene plastic, bonded together using a special hot-melt adhesive through an extrusion molding process.

Why Crosslinking?

External layer: PEX-B (Silane Cross-linked

Polyethylene)

Cross-linked Polyethylene)

Changing the structure to increase heat resistance and strength of the pipe.

- Insoluble & infusible solvent resistance, high-temperature resistance
- Crosslinked construction Impact / tensile strength, creep resistance, scratch resistance

Description:

- r = head loss (Pa)
- f = friction factor
- ρ = density of the fluid (kg/m³)
- V = the velocity of the fluid (m/s)
- D = the pipe inner diameter (m)
- L = pipe length (m)
- e = relative roughness
- Re = Reynolds number
