

GREY PVC SHEET

CHARACTERISTICS

It has excellent chemical stability, corrosion resistance, high hardness, high strength, anti ultraviolet (anti-aging), fire retardant (self extinguishing), reliable insulation performance, smooth surface, no water absorption, no deformation and easy processing.

FUNCTION

- Relative Density: 1.35-1.45
- Static friction coefficient: 0.4-0.5
- Dynamic friction coefficient: 0.23
- Melting temperature: 160 °C
